

**0** SPRAY DEVICE

**1** SPRAY DEVICE

**Product Description**

Be used for dust suppression during column landing. Use the conic nozzle to form circular jet flow, good atomizing effect (when the water pressure is 10 MPa, the atomizing effect is best).

Safety standard model	Installation hole	Water Inlet	Atomizing shape
PWZ.01	φ13	DN10	90° circular cone
PWZ.00	φ13	DN10	sector

**P** BACK TO THE OIL SHUTOFF VALVE

**1** BACK TO THE OIL SHUTOFF VALVE

**Product Description**

Be used for the control of mining hydraulic frame system, It acts on the liquid returning pipe to prevent malfunction caused by the flowing back liquid of other complete frame.
